
Senior Developer/Engineer

8+ years' success leading IT software engineering innovation for high-growth organizations

Solution-oriented, result-driven, software professional with broad-based experience and hands-on skills in successful architecture, design, development, and testing of software and systems. Equipped with proven expertise in core IT processes, project management, business operations, and systems integration. Frequently noted for increased productivity, business objectives, resolution, and core analysis of leadership and margins. Fast learner with well-defined analytical, communication, and mentorship skills. Technically proficient thriving in environments that constantly embrace new technology.

Highlights of Expertise

- Project Planning & Development
- Application Development
- Server Management & Optimization
- Contract Development / Negotiations
- Development Life Cycle Management
- Software Design & Development
- Database Modelling
- Systems Analysis
- Team Leadership & Collaboration
- Agile Methodologies

Career Experience

Shopify Inc, Toronto, Ontario, Canada

2020 to present

Shopify *Shopify is a platform built for independent business owners of all shapes and sizes to start, sell, market and manage their businesses online, in-store, and everywhere in between. With a comprehensive set of industry-leading tools, Shopify has helped over 1.7 million people in 175 countries take control of where they take their businesses.*

Backend Developer (2020 to Present)

Contribute to development of the first party application Google Sales Channel on Shopify, and Shopify platform. This was done by individual contributions to planned projects, sharing expertise and developing solutions to feature requests and issues.

- Contribute to Frontend, React powered UI component kit Polaris
- Participate in user requirements gathering, project planning, design, implementation, and testing.
- Developed solutions for first party sales channel application on the Shopify platform

IBM ISC, Bratislava, Bratislava Region, Slovak Republic

2012 to 2020

IBM leads in the creation, development, and manufacture of the industry's most advanced information technologies, including computer systems, software, networking systems, storage devices, and microelectronics.

APPLICATION CONSULTANT (2018 to 2020)

Oversee all aspects of project management and development for the IBM Bratislava sector project by creating technical requirements as well as reporting, project tracking, velocity, and release management.

- Administered the first global cloud applications implementation for IBM developer advocates, including user training and support.

continued...

- Pioneered an endeavour to migrate enterprise application to Kubernetes by establishing a custom bare-metal cluster without previous experience in implementation or assistance from team members.
- Provide software recommendations and proofs of concepts to assist clients in meeting business objectives.
- Participate in user requirements gathering, project planning, design, implementation, and testing.
- Designed and developed Developer Advocacy Platform Application for CEE.
- Evaluate present software capacities and company needs of customers to define any inadequacies.

APPLICATION DEVELOPER (2016 to 2018)

Developed and implemented personalized client solutions using Cloud Native methodologies and Node.js/Kotlin programming language expertise.

- Spearheaded the design and development of software via an agile development team.
- Utilized Docker, Kubernetes, and MongoDB technologies to develop new applications and platforms.
- Managed individual project priorities, deadlines, and deliverables.
- Mentored a team of Application Developers.
- Participated with clients in discussion meetings and developed an understanding of customer issues to advocate their needs with cross-functional teams.

WEB DEVELOPER/IT SPECIALIST (2012 to 2016)

Maintained corporate websites, creation of new web applications, and browser extensions for internal uses.

- Provided continued maintenance and troubleshooting including fixing prevailing bugs for existing web applications.
- Collaborated with developers to ensure technical designs were fully understood, and development initiatives were aligned with the intended design and standards.
- Furnished technical support for escalated incidents/outages to ensure efficient resolution with minimal impact to external clients.
- Assisted clients with requirements definition.

Education & Credentials

Pan-European University, Bratislava, Slovakia

BACHELOR OF APPLIED INFORMATICS

Secondary School of Electrical Engineering Adlera, Bratislava, Slovakia

HIGH SCHOOL DIPLOMA IN COMPUTER SCIENCE

Technical Proficiencies: Node.js, TypeScript, MongoDB/Cloudant, MySQL/PostgreSQL, PHP, User Experience, CloudFoundry, Ruby on Rails, Postgres, Angular, GitHub, Travis CI, Agile/Scrum, Docker, Kubernetes, Adonis.js, MongoDB, Html, JS, CSS
